Meanwhile Honorable Advisor & CEO of the University JV'n Vedant Garg Ji has blessed all the successful entrants of this Quiz Competition held under the premises of Faculty of Education and Methodology. The event concluded with Vande Matram.

The Dowry System

(Article by JV'n Nibedita, BA Journalism)

The Dowry System Dowry is the process of giving bribe to the groom by the bride's family as a gift so that the groom will take care of the bride. The system is not started from today but it is a very old system and is a curse for our society. Earlier in dowry system bride's usually used to give gifts like furniture, household requirements, jewellery etc. But as the day passes it is evolved into a huge sum of money that is given to the groom by the bride's family. In this system the money that is given to the groom is decided according to his profession and qualification that is if the groom earns a good amount of money and he is well educated and belongs to a good family background then the groom's family will demand more money in dowry as compared to the less qualified and

average earning groom. As coin has two sides of it, same as the coin everything has its two sides, one is positive and one is negative. And the dowry system has its advantages and disadvantages. Advantages:- The money that is given as a dowry can support the couple to start their new journey of life. It supports them financially and mentally. It also increases the respect of bride's in their in laws home. It also gives the opportunity for further studies and to live a good life. Disadvantages:- Due to the demand of dowry, the parents of bride has to face a lot of burden and difficulties. Due to this system the birth of a daughter is believed as a burden specially in poor family because they have to collect money for their daughter's marriage. Many grooms demand a lot even after the marriage and pressurize the bride and her family to give more money due to which many brides commit suicide. If the demand is not fulfilled then the status of the bride becomes low in the family and many time, they used to do domestic violence. As the disadvantages are in high amount than the advantages of this system so it is considered as a curse of the society. Seeing this, the government in-acted an act that is "The Dowry Prohibition Act", 1961 deals with dowry in India. According to this law giving or taking or advertising of dowry is a punishable offence. But this is not going to come unless we as a society do not stop this practice. We as a society should always encourage to educate the girls, give them the chance to make their own career and to be independent, not to discriminate with them and not to consider girl child as a burden. And we should never encourage the people to take any dowry.

WHY WOMEN'S ARE LESS IN WORKFORCE THAN MEN?

(Article by JV'n Nibedita, BA Journalism)

Women's are the important part of this society. A woman can do anything within limits or beyond the limits but they can do the same and even more than a man. But the society didn't accept them as this much strong what they are in reality...whether it is in any field or in any work force always the number of women's are less than the men. Why? The main reasons behind this problem are: - Many people thought specially in the poor family or in the village area people thought that the birth of a daughter is a burden for them so they killed them before their birth or if they give birth to a girl child then also they never give the facilities and the opportunities what they give to their son. Its also about the mentality as well because most of the people thought that women's should do the inside home work like cooking and taking care of their parents and it is the work of a man to go outside and work and earn for their family. Many parents give their daughter's marriage at very early age. They don't even give them a chance to be independent and to do a job. Before all these and after completing the studies they hurriedly do the marriage of their daughters. For them their son in laws income matters only not their daughters income. The main cause of this problem is that the parents never treat their son and daughter as equal. For example parents always give dolls to a daughter and always told her that you should be polite and work inside only whether their son can do anything whatever they want. It's a mandatory thing to do a job or to earn well for a man but not for a woman. Many companies also do discrimination against women by paying them less than men. Now the key responsibilities to solve this problem as a society: We should give the equal rights and respect to the women's. We should never discriminate between men and women. Women can do anything so we should always support them and help them to fulfill their dreams and whatever they want to became. We should support them to be independent so that they don't have to be depend on anyone.
