Each breakthrough in the field of law has been revolutionary, from typewriters to computers, from using libraries solely for legal study to using internet portals to find relevant case laws, from fax machines to emails. Now is the moment for AI to enter the legal profession. Although the legal services market is one of the largest in the world, it is also believed to be under-digitized in its operations. The legal profession is fairly conventional in its approach and hesitant to adopt new technologies. Hence, Faculty of Law & Governance , Jayoti Vidyapeeth Women's University Jaipur organized a Seminar "Artificial Intelligence " ,

The resource person were Mr. RYAN W. COPUS , and Mr. Tom Associate Professor at University of Missouri-Kansas City School of Law, Kansas City.
