(57) Abstract :

The present invention relates to a composition of plant ingredients in powder form to boost and enhance immune system. The composition is free-chemical compounds which are harmful to the body in the long run. The medicinal character of each plant ingredient brings the reputation of as an alternative synthetic supplements or drugs for living organism. Beverages play a critical role in young childrenTMs health as they comprise a larger portion of the recommended overall diet during early life, serving as key contributors to both hydration and nutrition. Establishing healthy beverage patterns during this period of life could be an important public health intervention to help promote adequate intake of nutrients to encourage and to reduce excess intake of nutrients to limit, which could help mitigate risk of adverse health outcomes such as dental caries and obesity. For these reasons, promoting healthy beverage intake during early childhood is a public health priority.
