Full-Time CCTV Surveillance:

To ensure complete safety and security, we have installed CCTV cameras at all key locations within the campus. These cameras are monitored by trained security personnel round-the-clock, ensuring that any suspicious activity is immediately detected and reported. The footage is also regularly reviewed for any potential safety risks or incidents.

24x7 Security at all Checkpoints:

Our institution has a strong and reliable security infrastructure in place, with security personnel stationed at all checkpoints round-the-clock. Our security personnel are equipped with the necessary training and tools to handle any potential safety issues that may arise. In addition, we conduct regular safety drills and trainings to ensure that our personnel are always prepared to handle any situation.

Authorized Communication:

University understand the importance of communication between parents and students. To ensure that our students have access to a secure and authorized communication facility, we have implemented a system of landline phones that only allow calls to be made to pre-verified mobile numbers authorized and registered by their parents. This system is designed to provide an additional layer of security and peace of mind to parents, knowing that their daughters can only make calls to authorized numbers. It also ensures that our students are not exposed to unwanted calls or communication from unknown sources, which can be a potential safety concern.

This system of authorized communication facilities through landline phones not only provides a secure way for parents and students to stay in touch but also helps to promote responsible phone usage among students. By limiting calls to authorized numbers, students are encouraged to use their phones only when necessary and to focus on their studies during class time.

The implementation of authorized communication facilities through landline phones is just one of the many measures we have taken to ensure the safety and well-being of our students.
