(57) Abstract :

The present invention relates to a novel educational system and method for deaf and dumb people. More particularly, the present invention provides e-learning systems and methods for dumb and hearing impaired people especially females. The said system allows the user to capture images or the voice signal of the speaker and communicate it to the specially abled females in the real world. The said system displays the results as text which can then be read by the deaf and dumb females.
