**A Seminar conducted on "Artificial Intelligence " for Law students of Jayoti Vidyapeeth Women's University Jaipur on 11.1.2023 by International Delegates with an aims to introduce the logic and specific issues of Artificial Intelligence (A.I.) in legal sectors and Learn about long-standing theory in law and artificial intelligence**

Each breakthrough in the field of law has been revolutionary, from typewriters to computers, from using libraries solely for legal study to using internet portals to find relevant case laws, from fax machines to emails. Now is the moment for AI to enter the legal profession. Although the legal services market is one of the largest in the world, it is also believed to be under-digitized in its operations. The legal profession is fairly conventional in its approach and hesitant to adopt new technologies. Hence, Faculty of Law & Governance , Jayoti Vidyapeeth Women's University Jaipur organized a Seminar "Artificial Intelligence " .

18 May, 2023: Under the community development activities being run under Unnat Bharat Abhiyan, students of Jayoti Vidyapeeth Women's University participated in waste management activities to celebrate JV Mantra Day Green-Clean-Happiness.

University's Waste Management Activity Theme for the Month of May 2023 is "Preparation of Handmade Paper Sheets & Paper Bags and creating Beautiful Bird Houses from Waste Material/Items." These two-day activities started from 18th May where students participated in making handmade paper sheets and paper bags from waste material/items and making bird house from waste material. These bird houses would later be hung on the trees of the university, so that birds could take shelter in these houses.

In a significant stride towards promoting sustainability and combating paper waste, University has developed a ground breaking recycling process Under University Startup Centre- Punar Janam that converts paper waste into high-quality paper. This innovative technique marks a remarkable achievement in the field of recycling. With the growing awareness of environmental issues and the increasing demand for sustainable alternatives, this breakthrough in paper recycling ushers in a new era of responsible production and consumption. By harnessing the potential of paper waste, we can significantly reduce our ecological footprint while simultaneously meeting our paper needs.
